College of Agricultural Engineering and Technology, Hisar, one of the institutes of agriculture importance, has been successful in carving niche for itself in the list of agricultural engineering intuitions imparting mechanized farming to the farmer of the country. To engineer the next green revolution in the country and ensure sustainable agricultural growth and fulfilling the increasing demand of technocrats, the university has responded by establishing the College of Agricultural Engineering & Technology (COAE&T). The University with its excellent infrastructural facilities and dedicated team of educators is striving hard to imbibe core skills, moral values, high aptitude and management abilities among its students for overall development of agricultural sector. The students have been exposed to strong foundation courses in terms of analytical and computing skills. With emphasis on problem solving and laboratory projects in small teams, they are prepared to work deeply in the real working environment. The students have worked with faculty members on a number of innovative projects. It is a matter of pride for this new institute that some of their works have been published in International conferences. On behalf of CCSHAU Hisar, it is my privilege to invite companies for the placement that are looking for talented pool of people. I am sure that you will be greeted with young, bright and aspiring minds.

College of Agricultural Engineering & Technology, CCS Haryana Agricultural University, Hisar is dedicated to students' service and excellence in education including experiential learning and industrial training. Well planned course structure and curriculum is designed to offer an opportunity to enhance their knowledge and skills to face the present ambitions of the industry. Moreover, for skill and leadership development, the Institute has developed linkage and continuous interaction with prestigious companies and organizations engaged in agri- business. Knowledge enhancement through quality and commitment is the motto of this institution. Faculty of Agricultural Engineering is supported with vast infrastructure facilities at CCS Haryana Agricultural University, having well equipped ultra-modern laboratory facilities to impart practical training in precision agriculture, latest agricultural machinery, farm machinery testing, modern irrigation and drainage technology, agro-processing, post- harvest technology, new & renewable energy etc. In brief, our students are best prepared to tackle the emerging task of agricultural development and sustainability in coming times. Our firm belief in quality and need based learning has developed special relationship between the students and the institution. Highly qualified academicians have prepared a ground for young minds to uphold their potentialities and bring out the excellence in them. Due importance is also given to extra-curricular activities with a focus on over-all of the students. Our students will be an asset to any organization ready to reap the benefits of innovation in agricultural engineering. Our aim is to active organization/entrepreneurs in identifying the individuals, best situated to their needs and developing a successful recruitment relationship. My heartiest wishes for their successful career

Providing quality education to the graduates is the most important mandate of any university, more so, that of an agricultural university. It is perhaps even more important to give the students a greater degree of exposure to the current national and international situations vis-à-vis prospects and possibilities of landing a career befitting their qualification, needs and aspiration. In the recent times, the world of engineering force has undergone a sea change. The placement opportunities in public/private sector are very competitive. Besides providing information on employment opportunities, the C&P Cell keeps the students abreast of various courses, admission procedures, fellowships, financial assistance etc. available for higher studies in India and abroad. They are also acquainted with the facilities and incentives available with various departments under self-employment promotion programmes. A fortnightly magazine 'Career Bulletin' carrying such information is published regularly by C&P Cell. The dual purpose of university industry linkage has been to ascertain the needs of the industry & prepare the students accordingly and internship of the students in these industries. Various organizations from the public/private sector have been giving opportunity of the University students for summer internship on regular basis and a large number of graduates/postgraduates have done their summer internship through these interviews. These organizations in the private/public sector include tractor industries, irrigation companies and other agricultural based industries etc. At present the university is in touch with more than 100 companies and has been inviting these companies for summer internship for students. This process goes on unabated. Interface discussion of students with industry executives has been started as a regular feature. I am sure the students will prove to be an asset to the organization.

TRAINING AND PLACEMENT COORDINATOR

“The most important function of education at any level is to develop the personality of the individual and the significance of his life to himself and to others.”

- Grayson Kirk

We are pleased to welcome you to the campus of CCS Haryana Agricultural University, for the recruitment process of Agricultural Engineers graduating in 2014. We feel it to be an honour and privilege to present you a group of young, vibrant individuals. Our students are potential technocrats, managers & leaders in their chosen fields of activity across different sectors & industries.

Our faculty has groomed these young engineers with great care, ensuring that the best available inputs and the latest technology have gone into the process with the core of the course lying in agricultural engineering. Students have also been exposed to a variety of general engineering subjects including mechanical, civil, electrical, electronics, computer and management techniques.

The rigorous academic curriculum supported with co-curricular activities has equipped the students with the professional and personal skills to excel in whichever sector they choose to work for. This further enables them to adapt to various challenging situations with confidence. There is no doubt in our mind that they will surpass all expectations when it comes to fulfilling your organizational objectives.

Once again, we welcome your organization to the campus of CCSHAU for the recruitment of the graduating students of agricultural engineering. We are sure, your presence at our campus will be of immense mutual benefit.

Student's Coordinator

“This is learning in the business life that first of all you need to have commitment, dedication and passion for what you are doing.”

COAE&T has proved to be the most preferred destination for aspiring technologists from across the country. The institute consistently attracts the finest faculty and the best of students for its Bachelors programmes. COAE&T has a rich tradition of pursuing excellence and has continually re-invented itself in terms of academic programmes and research infrastructure. Students are exposed to challenging research based academics and a host of sport, cultural and organizational activities on its vibrant campus. The presence of world class facilities, vigorous institute-industry collaborations, international exchange programs, interdisciplinary research collaborations and industrial training opportunities help students of COAE&T to excel and be ahead in the competitive professional environment.

We highly value our partnership with recruiters, alumni and friends of COAE&T and remain committed to making your recruiting experience productive and positive. We invite the recruiting organizations to find the best match between their needs and capabilities.

About the College

The degree programme of B. Tech. (Agril. Engg.) was started in the Academic Year 1987-88 under the Department of Agricultural Engineering of College of Agriculture, CCS HAU, Hisar. The College of Agricultural Engineering & Technology was established in 1991 under the Act and Statutes of the University with the objective of catering to the teaching, research and extension needs of the State of Haryana in the discipline of Agricultural Engineering. The College now has excellent training facilities in the field of undergraduate and postgraduate education. Because of the excellent training imparted by the College, many of its graduates & postgraduates have attained responsible & prestigious positions in organizations of repute in the country. The College has three departments namely Soil and Water Engineering, Farm Machinery & Power Engineering and Food & Processing Engineering and Section of Basic Engineering. At present, agriculture in India is facing many problems related to water management, farm mechanization, rainfed farming, post-harvest technology and energy utilization. Substantial contribution from the discipline of agricultural engineering and interdisciplinary approach with other related specialists can help devise suitable technology for specific situations. Obviously, if any breakthrough in tillage technology, crop production, irrigation and drainage techniques, diseases and pest control, post-harvest technology etc. is to come, it will be by adopting engineering techniques in a systematic manner. In this regard, College of Agricultural Engineering and Technology is playing paramount role in preserving and sustaining the natural resources of Haryana State.

Moreover, it being the only College of its kind in the State, is fulfilling not only the aspirations of the students desiring to pursue the programme of agricultural engineering but also the professional manpower needs of the Government, Semi-Government and Corporate Sector.

Why Recruit from?

CCS HAU

- One of the leading Agricultural Research Universities/Colleges in Asia
- State of the art infrastructure including one of the best research libraries in Asia
- Highly qualified faculty
- Distinguished Alumni
- Balanced Course Structure
- Rigorous Training for Quantitative and Qualitative Aptitude
- Summer Training in Top Research Institutes
- Reputed past Recruiters and Good Placement Record
